L'ANTIQUE GROUP

These French cradle telephones are enhanced by their individual decorator details and finishes. Each phone is hand crafted in subtle metal sculpture and in patterns that make each a "one of a kind" instrument. All the parts are matched in design and finish. The L'Antique group shown above are: (top center) D412 #32 Silver... heavy silver scroll and detail in a satin finish. (top right) D413 #35 Moss Green... small repetitive designs over this green finish gives a full feeling of richness. (bottom row) D414 #1 Gold... overall nubby surface in a brilliant gold finish. D415 #33 Burnished gold... an orange gold finished burnished with details to accent this decorative case. D416 #17 Gold and Black Splatter... a marble or tortoise-like effect carried overall that gives this elegant smooth finish its sophisticated manner.

FREE-With Purchase of Garrard Changer & Cabinet - A Cartridge & Needle

GARRARD RECORD CHANGER

Built to Garrard's highest standards, this handsomely designed 4-speed unit is actually an exceptionally compact automatic turntable at the price of an ordinary record changer!

It was designed to introduce a new concept of performance and versatility to systems where space must be considered. Despite its modest price, dealers large and small, in all parts of the country, have included its predecessor in the overwhelming majority of advertised music systems which they preselect. These dealers are aware that they can combine the 40 Mk II with the finest amplifiers, receivers and speakers, and offer them to their most

discriminating customers assured that it will be compatible and an enduring credit to their judgement.

The widespread dealer confidence which this Garrard model type has earned, is as significant as the impressive list of features which the 40 Mk II offers. This is the lowest priced Garrard automatic turntable, but all Garrards must meet the same high standards of quality. The 40 Mk II may be purchased with complete assurance that it will serve its purpose admirably, operating with utmost reliability from the beginning, and for years to come.

GARRARD RECORD CHANGER

Just two years ago, with the introduction of the Lab 80, Garrard set a spectacular precedent in record playing equipment — by combining precision, performance, and convenience to a degree not previously available in either single play or automatic units. Due to this extraordinary product, the entire industry has witnessed a revolutionary upgrading in fine record playing equipment.

Now, consistent with the Garrard leadership tradition, the Lab 80 Mk II is introduced. It is the Lab 80 brought to perfection... subtly but magnificently refined in appearance and engineering. All the Lab 80 developments remain, but in addition, there are useful new operating features. One of them is provision for automatic play of a single record. The Lab 80, which was the first automatic player to have an integrated cueing device, retains

this outstanding feature, which differs from all other types since it is hydraulically operated. The anti-skating control introduced to the automatic field by the Lab 80, has been refined, with the compensator now calibrated at half gram increment markings, and employing a counterweight with a window to facilitate accurate settings. Refinements in the Lab 80 Mk II have been carried even to the turntable mat. It is now designed with safety rings which protect the stylus should the arm be lowered accidentally, without a record on the turntable.

The Lab 80 Mk II is also an outstanding example of ingenuity and good taste in contemporary product design, with its distinctive tone arm assembly, turntable and mat, and a newly styled, raised control center, with fluted tab operating levers.

ALL DYNAMIC PRODUCTS ARE UNCONDITIONALLY GUARANTEED

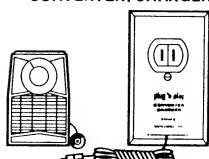

CHARGATRON AUTOMATIC HOME BATTERY CHARGER

Now you can recharge all your household batteries — four at a time — with no possibility of overcharging. Chargatron Automatic selects the correct charging rate for each type and combination of batteries, and stops automatically when batteries are fully charged. The exclusive Safe-T-Plug transforms house current to a harmless low level at the wall plug — an additional protective feature. Handsomely styled and packaged, UL-listed and unconditionally guaranteed by Dynamic. Battery tester is included for your convenience.

PNC-13-C \$ 7.95
 PNC-12-C (Standard Model) .. \$ 5.95

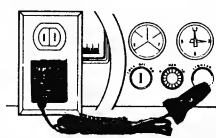

PLUG 'N PLAY TRANSISTOR RADIO CONVERTER/CHARGER

Now you can play your transistor radio from house current and recharge the batteries at the same time. It's like having 2 radios in one — a portable and a table top radio. It will keep reception loud and clear with no distortion. A permanent adapter stays in the radio — you just connect Plug 'n' Play to a wall outlet and instantly connect to ball adapter to play and recharge at home.

You will get top performance on the same battery for 2 years for only 5¢ in electricity.
 PNP-10-C \$ 5.95

CHARGE 'N START AUTOMATIC AUTO-CHARGER

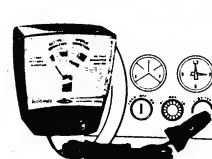

Now you can keep 12-volt car batteries fully charged, even in coldest weather, heavy traffic conditions or when unused for long periods.

It's so easy, even your wife won't mind the job. Just plug the charger end of the Charge 'n' Start cord into any household electric socket, and the other end into the car's cigarette lighter. No need to raise the hood. Leave it connected at least 10 hours — overnight or longer.

Charge 'n' Start does the rest — automatically, safely, with no danger of overcharging. And your car is once again at full battery power!

CNS-12-C \$ 5.95

AUTO MATE HOME AUTO ANALYZER

Now you can check the condition of your car's battery and electrical system... right from the front seat... without lifting the hood... in seconds! Just plug into the car's cigarette lighter. Auto-Mate's easy-to-read color coded dial tells you if your battery is weak, if your generator is operating properly, and if your voltage regulator is set properly. Pinpoints troubles and saves expensive guesswork. Now you can know that your car will start every time!

COMPARE THESE SPECIAL **RECORD-O-FONE®** FEATURES

- **INCREASES EFFICIENCY:**

RECORD-O-FONE's performance increases businessmen's efficiency, streamlines office procedures and coordinates communication in today's busy households.

- **SPECIAL REMOTE PLAYBACK:**

RECORD-O-FONE can be played back under control from outside the office or home. Your telephone messages are readily obtainable through any outside telephone.

- **UNLIMITED CALLS:**

RECORD-O-FONE can record an unlimited number of incoming calls. You receive 24 Hour, Seven-Day service continually.

- **EXCELLENT AUDIO FIDELITY:**

RECORD-O-FONE will reproduce your announcement and the messages left by your callers with a dynamic "life-like" quality. The high fidelity tonal response of RECORD-O-FONE was designed to meet the higher requirements of musical reproduction rather than ordinary vocal standards. The natural, warm, lively tone of RECORD-O-FONE is almost completely indistinguishable from an original voice.

- **INSTANT MESSAGE PLAYBACK:**

RECORD-O-FONE's extremely fast rewind permits messages to be played back instantly.

- **SPECIAL MONITOR:**

RECORD-O-FONE's special monitor feature allows incoming calls to be recorded and played simultaneously over a loud speaker. You may listen privately while a caller is leaving a message.

- **RELIABILITY:**

RECORD-O-FONE is the ultimate in automated telephone answering systems. It is backed by years of research and testing. The most advanced solid-state circuitry and telephone engineering know-how are combined to assure you of the most efficient year around dependable service. Even in the event of loss of power or malfunction, special "FAIL-SAFE" features will automatically clear the telephone line to allow for normal service.

- **LOW OPERATING COST:**

RECORD-O-FONE will work for you, 24 hours a day, for only a few pennies of electricity. It is practically maintenance free and will afford you years of dependable service.

- **VERSATILE DESIGNS:**

RECORD-O-FONE's smartly styled cabinet will beautifully blend in with any decor in either your office or home.

PANASONIC RJ-6

BY MATSUSHITA ELECTRIC

Major New Achievement in Walkie-Talkie Communication

This handsome, slim, compact set provides an important new benefit in walkie-talkie communication. When set is not in active use, it can be kept on "stand-by", with very little battery drain. When "signal" button is pressed, person called is alerted, and set can be put into operation.

This "continuous-contact" feature is the most useful, most wanted walkie-talkie benefit.

This is a power-packed transceiver, with very sophisticated push-pull circuitry. Range up to 10 miles, depending on terrain. Works on easily obtained, inexpensive batteries, which maintain life over long periods of use. Cabinet is tough and durable, in silver and black. Smart, distinctive styling.

Truly in a class all its own, the RJ-6 is ideal for ship-to-shore communication, surveying, farm use, golf course—so many uses in business and sports. No license or permit required.

\$99.90
